Software Built To Last

Custom web and mobile apps for startups and growing businesses, from the first sketch to the App Store and beyond.

Fixed price
Written plan before work starts

Weekly
Staging link and written update

Yours
Code, accounts and data in your name

Same team
From first call to after launch

WHAT WE BUILD

Web apps & SaaS
React, Next.js and TypeScript products with real users and real billing.

iOS & Android apps
React Native and Expo, taken all the way through App Review.

AI features that ship
RAG search, document Q&A and LLM integrations in production.

Internal tools & portals
Admin platforms, client portals and dashboards your team will use.

APIs & integrations
Django, FastAPI and Node.js back ends, wired to the services you already run.

Cloud & DevOps
AWS deployment with monitoring, staging and release pipelines.

RECENT WORK

Pepmax
Peptide dose tracker for iOS: calculator, dose log, subscriptions and push. Live on the App Store.

BoothIQ
Photo booth platform: booth software, web dashboard and a React Native app on one API.

Lift AI
Asset-management platform for the elevator industry: contracts, KPIs, compliance and insights.

HOW WE WORK

- A dedicated team and a named project lead on every project. No hand-offs.
- Fixed-scope milestones or hourly, with a written plan before work starts.
- Tests, code review and a staging environment on every build.
- Clear written updates in your time zone, and support after launch.

Have something that needs building properly?
