01 · THE BRAND

Software built to last

Tasknify is a software development agency that builds custom web and mobile products for startups and growing businesses. We take a half-formed idea, turn it into a working product, and keep owning it after launch.

Who we are for
Founders and operators who have outgrown off-the-shelf tools and need something built properly: a SaaS product, a mobile app, an internal platform, an AI feature that has to work in production.

What makes us different
A dedicated team and a named project lead on each project, end to end. Tests, code review and staging on every build. Written plans before work starts and written updates every week.

Tagline

Software Built To Last

Use on the banner, flyer, site hero and ads. Title case, no full stop. Do not shorten or add words to it.

Descriptor

Custom web and mobile apps for startups and growing businesses.

Use under the tagline, or alone wherever one line has to explain what Tasknify does.

Personality

Direct
Plain words, specific claims, no hype. We say what we build and show it.

Senior
Calm and experienced. We explain trade-offs instead of promising everything.

Durable
Built to last is a promise about quality, maintenance and ownership after launch.

02 · LOGO

The Check T

The mark is a single-stroke T whose stem ends in a tick: the task, done. It sits beside a lowercase **tasknify** wordmark set in Space Grotesk Bold. Both are outlined to paths, so no font is needed to use any logo file.

Horizontal, on light. The default. `logo-horizontal.svg`

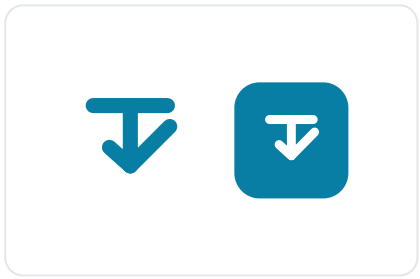

Horizontal, on dark. Mark in #58C4DC, wordmark white. `logo-horizontal-on-dark.svg`

Stacked. Covers, slides, square spaces. `logo-stacked.svg`

Stacked, on dark. `logo-stacked-on-dark.svg`

Mark and icon tile. Mark alone for favicons and watermarks; blue tile for app stores. `mark.svg` , `icon.svg`

One colour, black. Print, stamps, engraving.

One colour, white. Over photos with a dark overlay.

On primary blue. Only the white one-colour version.

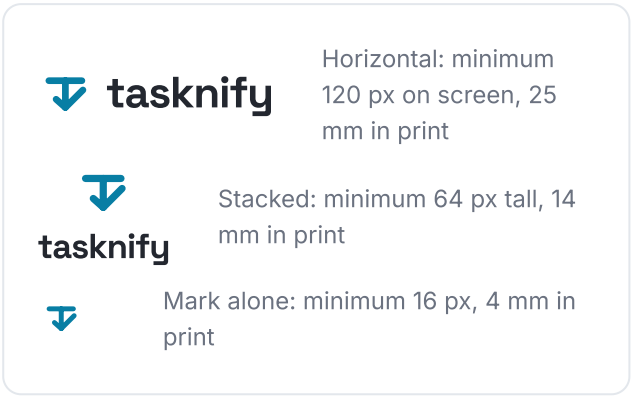

Which version to use

SURFACE	USE
White or light grey	Horizontal or stacked, default colours (blue mark, ink wordmark)
Black, navy or dark photo	On-dark version (teal mark, white wordmark)
Primary blue, busy photo, single-colour print	White or black one-colour version
Favicon, avatar, app icon	Icon tile (blue square, white mark); mark alone from 16 px

Clear space, size and misuse

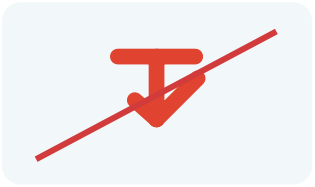

Clear space. Keep a margin of at least **x** on every side, where x is the stroke width of the mark (the thickness of the T's bar). Nothing else sits inside that margin.

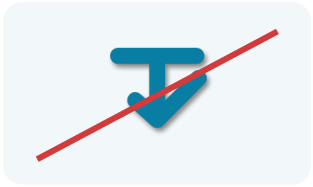

Minimum sizes. Below these the tick fills in and the wordmark loses its counters.

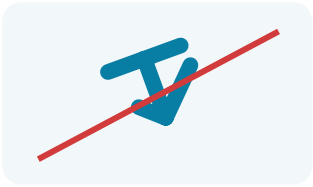

Do not

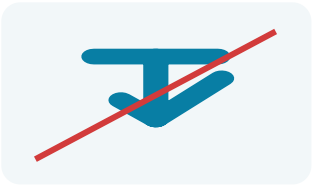

Recolour the mark outside the palette

Add shadows, glows, gradients or outlines

Rotate or tilt it

Stretch or squash it

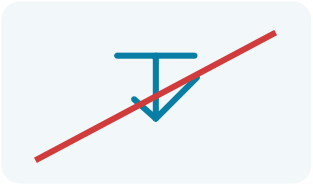

Reset the wordmark in another font

Capitalise the wordmark (prose: “Tasknify” is fine)

Place the colour logo on a busy or mid-tone background

Thin the stroke or redraw the mark

Writing the name

The company is **Tasknify** (capital T in prose) and the legal entity is **Tasknify Limited**. The wordmark is always lowercase. The website is written **tasknify.com**, never with www.

04 · COLOUR

One blue, two surfaces

Tasknify blue comes from the React and Expo tooling we build with. It has a deeper shade for light surfaces and a lighter one for dark surfaces; the two are never mixed on one surface.

Core palette

Primary
#087EA4
RGB 8 126 164

Primary on dark
#58C4DC
RGB 88 196 220

Ink
#23272F
RGB 35 39 47

Base dark
#050505
RGB 5 5 5

Base light
#FFFFFF
RGB 255 255 255

Supporting

Night
#040913 · banner, covers

Navy
#0F2040 · case-study cards

Body grey
#4B5563

Muted
#6B7280

Tint
#F2F7F9 · panels

Dark surfaces (site, banner, flyer, covers)

White text at 100% for headlines, 78% for body, 60% for captions. The blue appears as accents, eyebrows, the mark, and soft radial glows (#087EA4 at 25 to 55% opacity) behind the headline.

Light surfaces (documents, print, email)

Ink for headings and body, body grey for secondary text, primary blue for eyebrows, rules, links and one accent per page. Never use the on-dark teal on white; it fails contrast.

Accessibility

PAIR	CONTRAST	USE FOR
#087EA4 on #FFFFFF	4.7 : 1	Text 10 pt and up, icons, rules (WCAG AA)
#58C4DC on #050505	10 : 1	Any text size on dark (WCAG AAA)
#23272F on #FFFFFF	15 : 1	Body text on light
#FFFFFF on #087EA4	4.5 : 1	Buttons and the icon tile; keep text bold and 12 pt or larger

Space Grotesk and Inter

Two open-source families, both free on Google Fonts. Space Grotesk Bold carries headlines and big numbers; Inter does everything else.

Aa

Space Grotesk Bold

Headlines, section titles, statistics, the tagline. Weight 700 only. Letter-spacing −0.03em at display sizes, −0.025em at heading sizes. Line height 1.0 to 1.08.

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789

Aa

Inter

Body text, UI, captions, tables, buttons. Regular 400 for body, Medium 500 for labels, Semibold 600 for emphasis and eyebrows. Line height 1.4 to 1.6.

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789

Scale

ROLE	FACE	PRINT	WEB
Display	Space Grotesk 700, −0.03em	40 to 46 pt	72 to 88 px
Heading	Space Grotesk 700, −0.025em	22 to 26 pt	36 to 48 px
Subheading	Space Grotesk 700 or Inter 600	11 to 13 pt	20 to 24 px
Body	Inter 400	10 to 11 pt	16 to 18 px
EYEBROW	Inter 600, +0.18em, uppercase, blue	8.5 pt	12 to 14 px
Caption	Inter 400, muted grey	8.5 pt	13 to 14 px

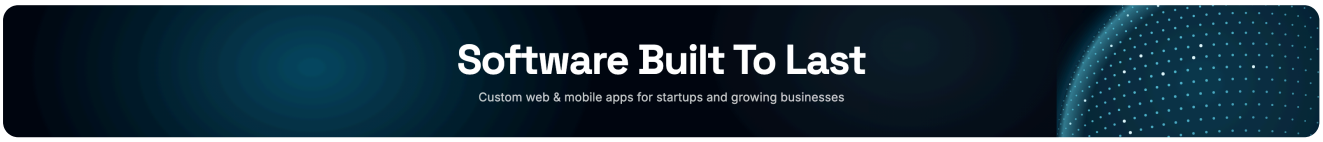

Rules

- Sentence case everywhere except eyebrows and the tagline. No all-caps headlines.
- Headlines are short: two lines at most, and never a full sentence with a full stop.
- One display headline per surface. Hierarchy comes from size and spacing, not from colour or italics.
- Big numbers (stats, prices) are set in Space Grotesk; their labels in Inter, muted.
- Fallbacks: when the fonts cannot load (email), use Arial for Inter and Arial Bold with −0.02em tracking for Space Grotesk.

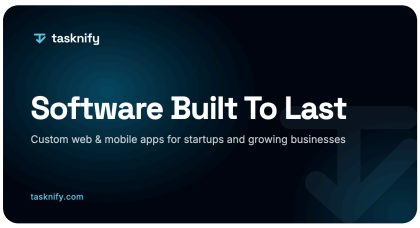

06 · VISUAL STYLE

Dark, calm, one idea per frame

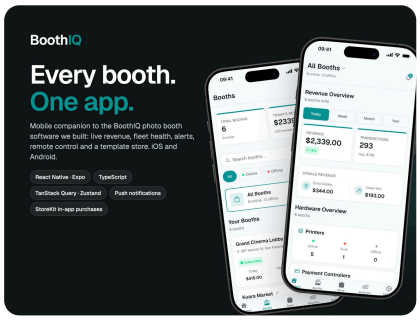

Marketing surfaces are dark and cinematic: a near-black base, one soft blue glow, one headline, one image. Documents flip to white and let the type do the work. Nothing is decorated for its own sake.

The pattern. Night base, a radial glow of primary blue behind the copy, the headline centred, the dotted globe as the single image. Upwork banner, 3200 × 320.

Open Graph image. Same pattern, logo plus descriptor, 1200 × 630.

Case-study cover. Navy base, eyebrow, big headline, device frames.

Screen card. Text top-left, screenshot in a browser frame bleeding off the edge.

Elements we use

- **Glow:** one or two radial gradients of #087EA4, 25 to 55% opacity, large and off-centre. Never a hard-edged shape.
- **Dotted globe:** the one illustration. Teal dots on dark, placed at an edge and partly cropped. File: `brand-src/upwork-banner/globe.svg`.
- **Screenshots:** real product screens in a rounded browser or phone frame with a soft shadow. Never mock data unless labelled.
- **Watermark:** the mark at 4 to 5% white, oversized, on card backgrounds.
- **Panels and chips:** white at 4 to 6% with a 14% border on dark; #F2F7F9 on light. Radius 12 to 28 px.

Elements we avoid

- Stock photos of people at laptops, handshakes, or abstract “tech” imagery.
- Neon green, neon cyan, purple gradients and glassmorphism. The old site used them; they are gone.
- Icons as decoration. Use an icon only when it labels something.
- More than one headline, more than one image, or more than one call to action per frame.
- Rotated text, outlines, bevels, 3D effects, and photographs of the logo.

07 · VOICE AND TONE

Say what we build. Show it.

Tasknify writes the way a good engineering team talks to a client they respect: plainly, specifically, without hype. Every claim is one we can show in a case study.

Principles

Specific beats impressive
"Shipped through App Review" says more than "world-class mobile solutions". Name the stack, the outcome, the timeframe.

Short sentences, plain words
One idea per sentence. No jargon the client would have to look up, and no adjectives doing the work of evidence.

We, not I; you, not "the client"
Write as the agency, to the reader. Avoid "our valued clients", "solutions", "leverage", "cutting-edge", "seamless".

Honest about scope
Say what is included and what is not. A proposal that names its assumptions wins more trust than one that promises everything.

Before and after

Avoid
We leverage best-in-class technologies to seamlessly transform your vision into reality.

Use
We take a half-formed idea, turn it into a working product, and keep owning it after launch.

Avoid
Our team of experts guarantees 100% satisfaction and unlimited revisions.

Use
A dedicated team and a named project lead on every project. Tests, code review and staging on every build.

Boilerplate

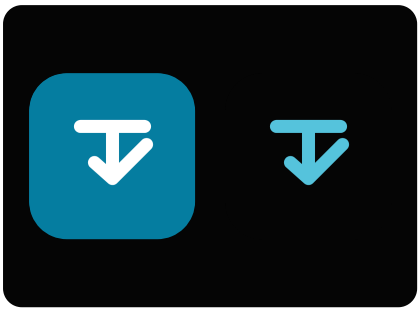

Short (one line). Tasknify builds custom web and mobile software for startups and growing businesses.

Standard. Tasknify is a software development agency that builds custom web and mobile products: SaaS platforms, iOS and Android apps, internal tools and production AI features. Every project gets a dedicated team and a named project lead, from the first sketch to launch and beyond.

Style points

- Tagline in title case: Software Built To Last. Everything else in sentence case.
- Numbers as figures: 47 jobs, 10+ years, $100K+. Spell out one to nine in running prose.
- Product and stack names as their owners write them: BoothIQ, Pepmax, Next.js, React Native, PostgreSQL, AWS.
- No exclamation marks, no emoji in profile copy, no "we're excited to".

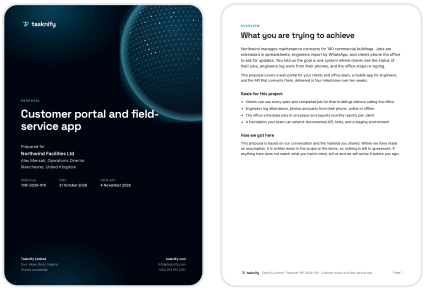

The brand in use

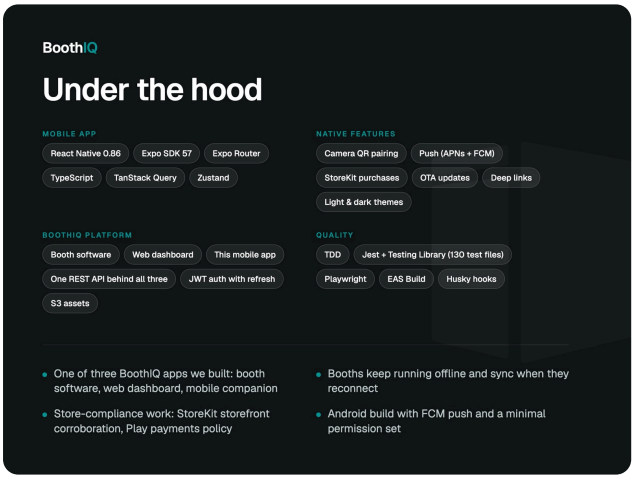

App icon and avatar. Blue tile for Upwork, social and the home screen; black tile for dark app-store themes. 250 × 250 for Upwork, 512 and 1024 px exports.

Flyer, A4. Tagline, proof stats, what we build, recent work, contact band. `public/brand/flyer-a4.pdf`

Proposal. Dark cover, white inner pages, seven sections, rendered from a JSON file per client. `brand-src/proposal`

Case-study cards, 2400 × 1800. Navy base, one layout per message: cover, points, screen, stack, strip, photos. Used on tasknify.com and as Upwork portfolio images. `brand-src/case-study-cards`

Website

Dark base #050505, accent #58C4DC, Space Grotesk headings via `.font-display`, Inter body. Open Graph image and favicons ship with the app folder. Case studies at /case-studies follow the card system above.

Upwork agency profile

Banner 3200 × 320, logo 250 × 250, tagline and overview from `brand-src/upwork-agency-copy.md`, portfolio images from the card renderer.

Checklist for anything new

- Dark surface or white surface, not a third thing
- One headline in Space Grotesk, body in Inter
- Correct logo version for the surface, with clear space
- Blue as accent and glow, never as a flood fill behind text
- Real screenshots in frames, no stock imagery
- Copy that names the stack and the outcome

09 · ASSET INDEX

Where everything lives

All files are in the tasknify.com repository. Finished assets are under `public/brand`; editable sources and renderers are under `brand-src`. Regenerate from source rather than editing exports by hand.

ASSET	FILES	NOTES
Logo	public/brand/logo-horizontal*.svg, logo-stacked*.svg, wordmark*.svg, mark*.svg, + PNG exports	Default, on-dark, black and white versions. Paths outlined, no fonts needed.
Icons	public/brand/icon.svg, icon-1024/512/192.png, icon-black*.png, icon-white.svg, apple-icon-180.png, favicon-32/16.png, upwork-logo-250.png	Blue tile with white mark. Site uses app/icon.svg and app/apple-icon.png.
Upwork banner	public/brand/upwork-banner-3200×320.png; source brand-src/upwork-banner	banner.html + globe.svg; alternate mark version kept alongside.
Open Graph	public/og.png; source brand-src/og/og.html	1200 × 630, referenced from app/layout.tsx.
